10 Licenses/CD

218207-B22 (QB-6LKAA-SE)

25 Licenses/CD

218208-B22 (QB-6LKAA-SF)

Introduction

Command Scriptor is a scripting application that provides command-level control of StorageWorks systems.. With Command Scriptor, you can create, edit, and run script files that contain StorageWorks Command Line Interpreter (CLI) commands. This scripting capability allows automation of frequently performed StorageWorks operations.

Two interfaces are included in Command Scriptor:

- Command line interface for local and LAN connections to StorageWorks controller
 - Browser-based interface for centralized, remote connection
 - Command Scriptor supports HSG80, HSG60, HSZ70, HSZ80 and HSJ80 StorageWorks controllers
-

Customer Benefits

- **Flexibility** – Support of many popular host operating systems allows Command Scriptor to operate in heterogeneous environments.
- **Easy to Use** – An easy to use Graphical User Interface (GUI) provides experienced IT managers command-level control of most HSG/Z/J controllers.
- **Improved Staff Efficiency** – Automation of frequently used CLI commands reduces IT personnel workload.

Features, Pre-Requisites and Documentation

Software Features/Functionality

- Web-based interface for centralized, remote connection to StorageWorks array controllers
- Command line interface for local, direct connection to array controllers
- Select agent host and StorageWorks subsystem
- Create and edit CLI script files
- Run saved CLI script files
- Execute a single CLI command
- Display CLI command history
- Display list of available storage systems
- Select storage systems based on world-wide identifier

Software Pre-Requisites

Command Scriptor is compliant with supported StorageWorks Array Controller Software (ACS)/HS Series Operating Firmware (HSOF) configurations. No additional configuration of the storage system is required. Command Scriptor coexists with StorageWorks Command Console (SWCC) and the HSG Element Manager (Required for use with Graphical User Interface.).

Host Operating Systems

- Windows® NT® 4.0, SP6A
- Windows 2000 Professional, Advanced Server, Data Center and XP
- SUN Solaris version 2.6, 7 and later
- Tru64 UNIX® versions 4.0F, 4.0T, and 5.0A and later
- OpenVMS version 7.1 and later
- HP-UX version 11.0 and 11.i
- IBM-AIX version 4.3.3, 5.1
- Controllers:
 - HSG80 ACS v8.6 & HSG60 v8.6 & 8.7 ACS (Fibre Channel)
 - HSZ70 HSOF v7.7 (Ultra SCSI)
 - HSZ80 ACS v8.6 (Ultra SCSI)
 - HSJ80 ACS v8.6 (CI)

Web Browsers

- Internet Explorer versions 5.0 and later
- Netscape Navigator versions 4.7 and later

Hardware Pre-Requisites

- | | |
|---------------------------|---------------------------------------|
| StorageWorks Array | • HSG80 ACS v8.6, 8.7 (Fibre Channel) |
| Controllers | • HSG60 ACS v8.6, 8.7 (Fibre Channel) |
| | • HSZ70 HSOF v7.7 (ultra SCSI) |
| | • HSZ80 ACS v8.6 (ultra SCSI) |
| | • HSJ80 ACS v8.6 (CI) |

Features, Pre-Requisites and Documentation

Definitions

Array Controller Software (ACS)/HS Series Operating Firmware (HSOF) – The firmware that implements features of StorageWorks array controllers.

CLI Commands – The commands supported by StorageWorks array controller software. For example, the command SHOW DISKS displays a list of disks attached to the controller.

Command Line Interpreter – In StorageWorks, CLI is a text-oriented command line interface that enables configuration and monitoring of a storage subsystem.

StorageWorks – A HP line of hardware storage solutions for multi-vendor server environments.

Distribution Media

HP StorageWorks Command Scriptor is available on its own CD-ROM distribution media. Also an update from Version 1.0 to 1.0A is available as a free web download to Command Scriptor users.

Documentation

HP StorageWorks Command Scriptor User Guide, Installation Card, and Release Notes are provided as printed documentation. Documentation is also provided on the distribution CD-ROM in Help files and PDF format. You may print the electronic software documentation accompanying the software as reasonably necessary to exercise your license to use the software. Browser accessible online help files are included in the Command Scriptor software.

Software Licensing

This software is furnished under the licensing provisions of HP Company's Standard Terms and Conditions. For more information about HP's licensing terms and policies, contact your local HP office.

Product Licensing

HP StorageWorks Command Scriptor is licensed per computer installation. Product is sold in 5, 10, and 25 license packages.

HP Care Pack Service and Support

Warranty

HP provides this software with 90-day conformance to documentation warranty.

- Product Support gives the customer access to HP's experienced technical support resources as well as access to HP's Information Services database
- Product support includes escalations and problem coordination with the appropriate engineering group.
- HP Services offer a variety of options to allow you to tailor your product service to meet the needs of your organization. Basic warranty on products can be uplifted from day one to ensure you receive the service you need when you need it.

Software Product Services

- Basic Per Product Telephone Support (annual support contract which includes standard business hours access (5 days x 9 hours), next business day response time and access to software patches)
- Per Product Installation Service (installation, configuration and startup testing)
- Telephone Service upgrades to basic per product support
 - 7x24 access
 - Service duration (1, 3 or 5 years)

Tailored support contracts based on personalized statement of work: contact your local support center via <http://wwss1pro.compaq.com/support/home/index.asp?pid=-1>

NOTE: This Web site is available in English only.

HP Care Pack Services

- HP Care Pack services are an upgrade of standard product warranty for hardware or software
- Available during warranty period only
- Prepaid rather than annual contract
